are now exclusively represented

in Greece by **SEA POWER**

HISAKA : MGO COOLER & PLATE HEAT EXCHANGER

We are pleased to inform you that our company has been appointed as Exclusive Agents for the product range of HISAKA WORKS LTD, as well as for the spare parts' supply of all their existing products.

Below you may find some of the benefits regarding the **MGO COOLER & PLATE HEAT EXCHANGER**

MGO COOLER with Pressure Buffer device

- **Trouble free from plate cracking** (The pressure Buffer Device protects from severe pulsation)
- **Optimal selection of PHE for the operating conditions** (Hisaka can give the excellent PHE solution based on durability test data)
- **Optimal sizing of Pressure Buffer Device** (Hisaka can also give the optimal solution for Pressure Buffer based on durability test data)

PLATE HEAT EXCHANGERS

- **High Performance** (Plate patterns formed from pressing provide heat transferring properties that 3 to 5 times greater than multi-tubular heat exchangers)
- **Lightweight and Compact** (Simple installation and with a weight and size of ¼ of other exchangers)
- **Speedy Startup** (A low volume of fluid allows a speedy startup and high precision)
- **Easy Maintenance** (The equipment can be easily be disassembled and assembled back together, visual inspection and cleaning is easy as well)

You may be assured that we and our principals will offer to your esteemed company the very best in efficiency and we are looking forward to cooperating with you in all future inquiries in respect of HISAKA products.

Should you require any further clarification, please do not hesitate to contact us.
